

Installation and Use Instructions for GRIPPS® Dropped Tool Prevention Equipment.

GRIPPS® Tool Holster

Models: H02062, H02017-19, HJ02047, H02047, H02048, H02049, H02054, H02055, H02057, H02058

H02054/H02055
Tape Measure Holster
Max Load (D-Ring): 2.5kg/5.0lbs
Max Load (Retractor): 0.7kg/1.0lbs

H02017/H02018/H02019
Single Tool Holster
Max Load (D-Ring): 2.5kg/5.0lbs
Max Load (Retractor): 0.7kg/1.0lbs

H02047/H02049
Scaffold Key Holster
Max Load (D-Ring): 2.5kg/5.0lbs
Max Load (Retractor): 0.7kg/1.0lbs

H02057/H02058
Tape Measure Latch
Max Load (D-Ring): 2.5kg/5.0lbs
Max Load (Retractor): 0.7kg/1.0lbs

H02062
Claw Hammer Holster
Max Load (D-Ring): 2.5kg/5.0lbs

H02046/H02048
Ratchet/Wrench Holster
Max Load (D-Ring): 2.5kg/5.0lbs
Max Load (Retractor): 0.7kg/1.0lbs

GRIPPS® Tool Holster

SAFETY INFORMATION

⚠️ WARNING Before using GRIPPS® Tool Holsters, read all provided safety information pertaining to the use of your Dropped Tool Prevention (DTP) device. **FAILURE TO DO SO COULD RESULT IN INJURY OR DEATH.**

The user of a DTP device bears the responsibility of reading all safety information contained herein. Keep this manual for future reference.

Intended Use:

When used properly, GRIPPS® Tool Holsters can prevent workplace hazards resulting from dropped tools. These may include personal injury and material damage.

GRIPPS® does not approve use of this device for any activities not described in the User Instructions. This device is not intended to be used in any recreational activity, as a personal fall-arrest device or in any other manner not described herein.

⚠️ WARNING Misuse of this device could result in serious injury or death.

Adhere to all manufacturer recommendations regarding the operation and maintenance of this device. For additional information, contact GRIPPS® customer support.

Read and adhere to the following in order to ensure correct operational functionality:

- Your DTP should never be used as a personal fall-arrest device or restraint system.
- Do not use this device with tools that exceed the specified maximum load/weight.
- A DTP device used in applications that exceed the limits of operation specified by the manufacturer should be considered unsafe and should be replaced.
- Do not tether a tool over 2.5kg/5.5lbs directly to your clothing or person.
- Inspect your DTP device before each use.
- Ensure the DTP device is securely connected to a load rated tool connector or anchor point before use.
- Inspect any tool connector point before it is connected to the DTP device.
- Modification of the DTP device voids all warranties and violates manufacturer recommendations.
- Do not use a tool that cannot be connected to your DTP in the manner specified by GRIPPS®.
- It is unsafe to extend the length of the DTP product by any means.
- Do not use this product if it will create an unsafe working environment.
- Ensure the tether does not become entangled with other workers, yourself or surrounding objects. Leave enough space between yourself and any hazards so that a tool on a fully extended tether can swing unobstructed should it fall.
- Avoid contact between the tether and rough or sharp edges.
- Use extra precaution around moving machinery, moving parts, electrical hazards, extreme temperatures, chemical hazards, or combustion hazards.

- All connected tools and equipment, including connection points, must be compatible for use with this DTP device.
- Always wear appropriate personal protective equipment.
- If a tether has arrested a dropped tool or object, it should be taken out of service and replaced.
- All procedures shown in this instruction are for GRIPPS® Tool Holster products only.

GENERAL USE AND CARE

GRIPPS® Tool Holsters are designed to keep your tools secure and accessible in a lightweight and industrial-grade design. Flaps secure the tool within the holster, and integrated d-rings allow for tethering to the holster itself. GRIPPS® Tool Holsters come in retractable and non-retractable variations.

Recommended Use of GRIPPS® Tool Holsters:

1. Use the appropriate tool holster for each specific tool.
2. When tethering to integrated D-Rings, use with tools that weigh up to 2.5kg/5.0lbs.
3. Velcro straps have a secondary Velcro patch that allow the strap to be secured open while tool is in regular use.
4. Ensure tools are tethered to the D-Rings or another load rated Tether Anchor point at all times while holstered.
5. All Tool Holsters are compatible with standard 50mm/2.0" work belts, and the GRIPPS® Mule Bag.
6. Only use with GRIPPS® tool tethers.

Before Use:

Thoroughly inspect your GRIPPS® DTP device before each use. Do not use any component that presents deformities or deterioration. Inspect all material including the carabiner and tether.

Tool Holster Use:

To secure your tool

1. If holster has a Velcro strap, ensure it is secured tightly over the tool when it is not in use.

2. If using a retractable model, ensure there is a GRIPPS® Swivel Catch connecting the tool to the retractor ring.

3. If using a non-retractable model, use a GRIPPS® tether to anchor directly to the D-Ring on the holster.

To secure holster

1. To connect to a tool belt, slide the tool belt through the space in the middle of the holster.

2. To connect to a GRIPPS® Mule Bag, slide strap through the middle of the holster and click buckle closed.

After Use:

Clean and inspect the Tool Holster, tethers and connected tool. For tougher stains, use warm water and a mild soap or detergent. Do not use again until dry.

Store in a clean and dry environment. Proper care will help to ensure that it will operate effectively and extend its service.
